

# Milliken® ClearTint™ CUV

## UV Absorber for Polyolefins

ClearTint™ CUV is a transparent UV absorber specifically designed for use in polyolefins. This additive can be used to inhibit UV light transmission in injection molding, thermoforming and blow molding. The technical and physical benefits of clarified PP can be exploited without sacrificing product aesthetics.

- Faced with increasingly more sensitive formulations, product designers are turning to the package to find the protection they need.
- Depending on the formulation, using a UV absorber in the package can offer significant cost savings vs alternative solutions dispersed in the product – ask your Milliken representative for comparative examples.
- UV protection is finding a home in a variety of markets – Health and Beauty, Food and Beverage and Healthcare just to name a few. Can be used in certain food contact applications.

## Transmission Curve

## Properties

**Physical form:** Colored Pellets

**Solubility in water:** Negligible

**Specific gravity:** 0.9

**Melting point:** 121 °C - 166 °C

**% Volatiles:** Negligible %

**Pellet size:** 100 - 120 pellets/gram

**Please contact your Milliken representative for further product information including chemical registrations, food contact status, and other regulatory details.**

PLEASE NOTE: As each customer's use of our product may be different, information we provide, including without limitation, recommendations, test results, samples, care/labeling/processing instructions or marketing advice, is provided in good faith but without warranty and without accepting any responsibility/liability. Each customer must test and be responsible for its own specific use, further processing, labeling, marketing, etc. All sales are exclusively subject to our standard terms of sale posted at [www.milliken.com/terms](http://www.milliken.com/terms) (all additional/different terms are rejected) unless explicitly agreed otherwise in a signed writing.
