

Suggested Color Groupings for Washing Milliken Table Linen Fabrics

The general rule for mixing table linen colors in the wash is to keep similar colors and similar degrees of color darkness together. If you have a nonstandard color not listed that you would like to know where to group or any questions about mixing colors call your Milliken technical representative at 1-800-322-TEAM or 864-503-1691.

Peach	5262	5786			
Pink	1461	1025			
Sandalwood	7842	7597			

Checkpoint and Signature Stripe must be washed with white or with itself to prevent color transfer.

Milliken recommends that all table linens, especially dark shades, be washed before renting to customers. Dark shades should be washed with only that color four to five times before mixing with a shade group.
