Connecting the World
for a Better Future

Innovation, inspiration, and imagination—all woven into the very fabric of our company since our start in 1865. These founding principles have guided our business decisions and shaped our customer-first value system for the past 155 years, and will continue to do so for decades to come. Today, Milliken & Company carries these timeless virtues forward and leads today's textile industry with cutting-edge R&D, strong materials, sharp colors, and sustainable strategies.

Our team's revolutionary, high-powered creations have garnered us a number of professional accolades, awards, and achievements, but more importantly, continue to positively impact today's public health, protective gear, and performance textile fields.

As one of the world's leading textile companies, Milliken has secured more than 3,000 patents and looks to continue its proud tradition of expertise and excellence in the industry.
