ORDER#: 01385945
6 Unique 1m x 1m tiles
installed randomly.

CONTINUOUS RANDOM®

Continuous Random® takes modular design and installation to another level. With Milliken's proprietary PrintWorks™ technology, carpet tiles have unique centers and matching edges, which enables designers to create floorscapes that look seamless. The edge-to-edge matching system makes it easy to customize wayfinding or define spaces within a larger floor plane.

Installation is simple and flexible as well. Just follow a monolithic layout to achieve a large pattern match aesthetic. Tiles are interchangeable, so when one needs to be replaced, you can choose any tile within the group. With the Continuous Random system, you have tremendous flexibility to achieve the form, flow and function you want.

EASY INSTALLATION & MAINTENANCE

No need to follow a predetermined set-match layout. Move tiles around and install them in a random arrangement to create the perfect layout for your space.

FLOORING MADE EASY

- ▶ Provides pattern match aesthetic without complex installation requirements.
- ▶ Simplifies procurement, installation and maintenance.
- ▶ Reduces necessary attic stock quantities.

100% MATERIAL TRANSPARENCY

CARPET FEATURURES

BACKING — Our carpet was made for high-traffic areas and won't lose their beauty like substandard floors do. Milliken WellBAC® open-cell cushion backing absorbs impact, extending life up to 50% longer than hardback, with an industry-leading Lifetime Warranty.

ACOUSTICS — Milliken makes the quietest floors in the industry. The acoustic technology of our carpet and Laterals LVT reduces in-room and through-floor noise by up to 50% compared to other flooring.

MOISTURE — We developed flooring systems to avoid costly moisture mitigation. Our carpet's WellBAC® open-cell backing allows the floor to breathe and moisture to evaporate. Our carpet has one-step no-test warranty options, and you can save significantly on prep, materials, and installation.

STAIN AND SOIL PROTECTION — StainSmart provides lifetime resistance for your carpet against penetrating stains and soil.

CARBON NEUTRAL PRODUCT — Climate change is one of the greatest threats facing humanity, and we are all responsible. That's why Milliken launched the M/PACT™ carbon neutral program. Today, our carpet, LVT and entryway tiles are carbon neutral everywhere in the world.
