# About Milliken

Fueled by innovation and commitment to design, Milliken has been exploring, discovering and creating ways to enhance people's lives since 1865. The company's community of innovators has developed one of the largest collections of United States patents held by a private company.

With expertise across a breadth of disciplines including specialty chemicals, floor covering and performance materials, Milliken combines design with proprietary technologies and unique insights to add true value to people's lives, improves health and well-being, and help make the world more sustainable.

Today, the company has more than 7,000 associates with 35 manufacturing facilities located in the United States, China, United Kingdom, Belgium, France, India and Australia. Milliken serves a variety of industries including transportation, building & infrastructure, hospitality, industrial manufacturing, architecture, design and specialty chemicals.

## Our Innovation Stories

Milliken has long led the way for 'knowledge based' investment, employing over 100 PhDs and accumulating more than 5,000 patents. We are invigorated by the challenge of finding creative ways to enhance people's lives and make the world easier, safer, more sustainable and more beautiful. From environmental sustainability to manufacturing excellence to textile leadership, Milliken's commitment to 'doing good' transcends all aspects of the company and guides our innovation process. We spend our days exploring, discovering and creating. We reimagine products that bring value to people's everyday lives.

## • A Community of Innovators

WE HAVE BEEN CREATING INNOVATIVE PRODUCTS, EMPOWERING INDIVIDUALS AND BUILDING A BRIGHTER FUTURE FOR OVER 150 YEARS. EXPLORE THE MILESTONES BELOW TO SEE HOW MILLIKEN HAS EVOLVED SINCE OUR FOUNDING IN 1865.

NOTE : The World's Most Ethical Companies designation recognizes companies that truly go beyond making statements about doing business "ethically" and translate those words into action.

## ● Our Solutions

AT MILLIKEN, WE SOLVE PROBLEMS AND BRING IDEAS TO LIFE THROUGH INSIGHT AND INNOVATION. WITH EXPERTISE IN RESEARCH, DESIGN, AND MANUFACTURING, WE DELIVER A DIVERSE RANGE OF SOLUTIONS THAT POSITIVELY IMPACT THE WORLD IN WHICH WE LIVE.

### WOUND AND BURN CARE DRESSINGS

Milliken's healthcare business manufactures an innovative range of wound and burn care dressings designed to handle moisture management and promote healing through Active Fluid Management® (AFM) technology. The AFM technology uses a micro-knit process to put together two layers of high performance fabric, creating a moisture transfer mechanism that pulls away and traps excess exudate. Combined with an innovative foam layer these fabrics keep the wound bed moist, the periwound skin healthy and harmful exudate away from a healing wound. This increased absorbing capacity allows for superior moisture management, longer wear times and ultimately fewer dressing changes.

### MILLAD® CLARIFYING AGENT

Polypropylene is an environmentally friendly resin with a low carbon footprint, low density and excellent recyclability. It is in demand for a wide variety of uses but its usefulness has been held back by its cloudy appearance. Building upon the company's polymer bound chemistry expertise, Milliken scientists devised a way to make this naturally hazy material clear without altering its mechanical properties. Millad is a clarifying agent that enables manufacturers to use polypropylene in ways never possible.

### VIS™ DIVIDE CONDUIT

Vis™ Divide is an innovative solution in cable deployment — a segmented high-density polyethylene (HDPE) rigid conduit that provides dedicated pathways for the placement of more than one cable in a single conduit. Vis™ Divide includes a fabric divider moulded directly into the conduit to increase the cable capacity, reducing wasted space and protecting the cables to ensure no cable over cable damage. By reducing the number of conduits required, Vis™ Divide reduces handling, storage and transportation costs and so improves construction productivity.

### LIQUITINT® POLYMERIC COLORANT

Many manufacturers want to add color to their products for brand identity, aesthetic appeal or differentiation. Milliken's team of innovators used their chemical expertise to create Liquitint, a polymeric colorant that offers quality, performance and microbial certification unmatched by dyes or pigments. Liquitint is water-soluble and contains no heavy metals, making it ideal for liquid dish washing products, laundry and other household cleaners. Liquitint is used in many of the certified 'green' cleaning products on the market today.

### FLAME RESISTANT FABRICS

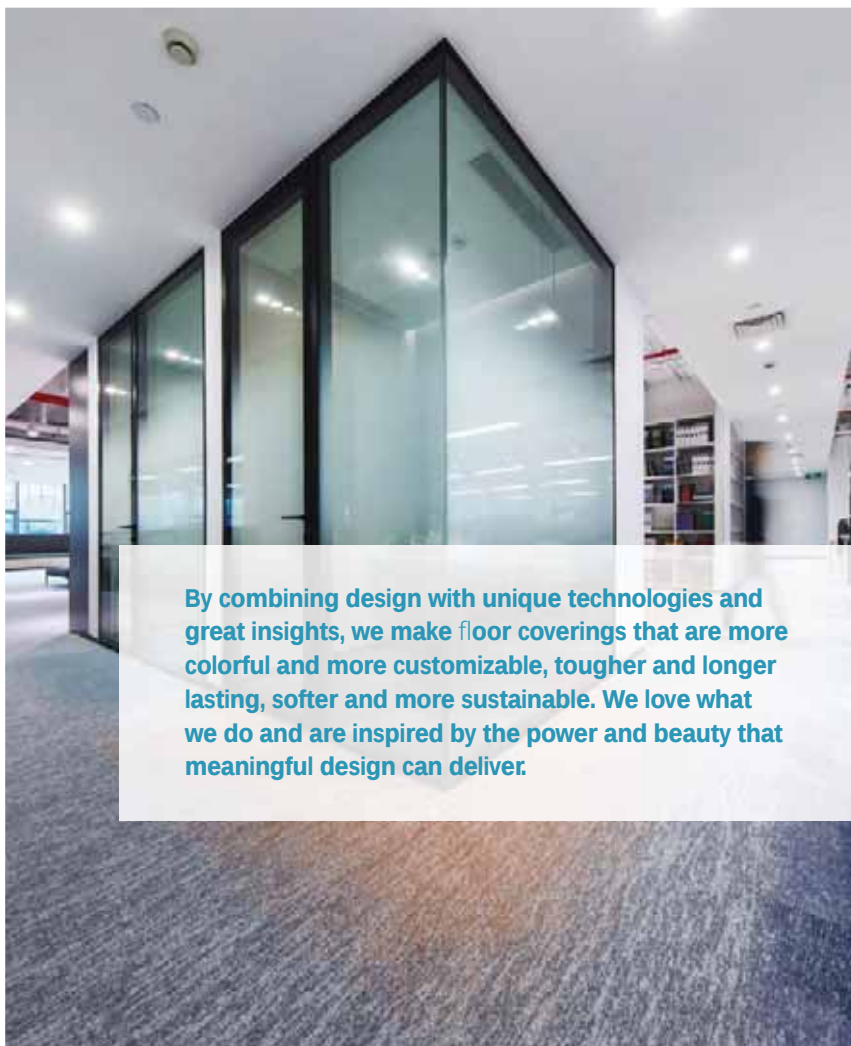

Milliken is one of the world's leading suppliers of high-performance protective flame resistant (FR) fabrics that can be seen in all types of work wear, from the factory to the fire service, as well as in all branches of the military. The highest levels of research, design, technology and innovation go into Milliken's military fabrics to ensure the ultimate standard of performance, including combat gear that offers better thermal protection from flames; camouflage technology that provides multispectral concealment; composites that reduce weight with high impact resistance; and quieter outerwear shells that help prevent troops from giving up their positions.

### HYPERFORM® NUCLEATING AGENT

How did Milliken scientists make polypropylene an environmentally friendly resin with a low carbon footprint, low density and excellent recyclability — an even greener choice for packaging manufacturers. By inventing Hyperform®, an additive that enables faster production and produces better part quality and less waste material during processing. Hyperform increases productivity by an average of 15% and reduces the energy needed to manufacture polypropylene parts. This means manufacturers can reduce costs, save machine time, reduce environmental impact and improve profitability. With Hyperform, it is even more attractive for manufacturers to substitute expensive, heavier or less environmentally-friendly materials, such as glass or other plastics, with polypropylene and polyethylene for parts, housewares and packaging.

# About Floor Covering

## • Locations

MILLIKEN'S CORPORATE HEADQUARTER IS IN SPARTANBURG, SOUTH CAROLINA.

The site is home to nearly 1,000 Milliken associates and features an Innovation Gallery, Customer Center, Research Labs and a Rapid Prototyping Center, the Milliken Guest House, and our nationally recognized Corporate Arboretum.

A global leader in specialty chemicals, floor covering, and textiles, we have manufacturing facilities in the United States, Mexico, United Kingdom, Belgium, France, China and Australia. Our sales offices, showrooms, development laboratories, and technical support centers extend Milliken's presence throughout the world.

**We create exceptional products and develop unique technologies that shift the way our customers think about floor covering.**

Milliken is one of the world's leading manufacturers of floor coverings for corporate, public space, retail, hospitality and leisure environments. Headquartered in South Carolina, USA, Milliken's floor covering division now manufactures on four continents and is one of the world's few truly global producers. With a network of sales, design and customer service teams in over 50 countries, Milliken has supplied floor covering products to some of the world's most prestigious, most demanding and highly trafficked buildings.

Our floor coverings bring together the spirit of innovation and engineering excellence of our parent company with the creativity and inspiration of our local design teams. By combining design with proprietary technologies and unique market insights, we make floor coverings that are as functional and sustainable as they are inspiring and original. We love what we do and are inspired by the power and beauty that meaningful design can deliver.

## ● Focus on the Asian Market

ENSURING A WIDER MARKET REACH AND TO FORGING BETTER RELATIONSHIPS IN ASIA, MILLIKEN'S ENTRY INTO THE ASIAN MARKET IN 1990 WAS A SIGNIFICANT STEP TOWARDS ADDRESSING THE NEEDS IN ASIA PACIFIC.

## ● Our Services in Asia

### LEAD TIME

With Milliken's flexible manufacturing system, we enable shorter lead time in the industry. Delivery can range from 2 days to 4 weeks.

### WARRANTIES

Our products are backed by lifetime commercial warranties that ensure quality.

### CUSTOMIZATION

The design center in Shanghai, China provides more flexibility for customization with combinations of modern colors and updated patterns.

### CHANNEL / PARTNER

We have a distributor / partner network that cover the entire Asia Pacific Region.

### LOGISTICS & CUSTOMER SERVICE

Milliken set up Logistics & Customer Service Center in Shanghai and Japan.

## ● A Full Range of Floor Covering Solutions

PROVIDING CLIENTS A CONVENIENT 'ONE STEP SHOP', MILLIKEN NOW OFFERS A FULL RANGE OF FLOOR COVERING SOLUTIONS. IN ADDITION TO A VAST PORTFOLIO OF CARPET TILE COLLECTIONS, WE ALSO OFFER A RANGE OF HIGH PERFORMANCE LUXURY VINYL TILES AS WELL AS INNOVATIVE ENTRANCE FLOORING SOLUTIONS.

### MODULAR CARPET

From our network of global manufacturing locations, we offer a full range of carpet tile collections ranging from luxurious, premium constructions for executive areas and boardrooms to high performance level-loop constructions designed to meet a budget.

Shadowbox and Shardlines in Hint, Shardlines in Tree Shade, monolithic installation

Eero Blueprint in Diagram, Overprint in Interlaced, Woven Stone in Swatch and Merge, herringbone installation

### LUXURY VINYL TILE - FLEXFORM™ & RIGID™

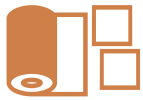

To complement our carpet collection, Milliken also offers an extensive range of high performance luxury vinyl tiles (LVT). Milliken's LVT collections offer supreme flexibility to coordinate with Milliken carpet designs to create a cohesive floor covering aesthetic from finish to finish.

## ● A Full Range of Floor Covering Solutions

### PrintWorks™ Digital Dye Injection

THIS HIGH RESOLUTION DIGITAL PATTERNING TECHNOLOGY WAS DEVELOPED BY OUR IN-HOUSE R+D TEAM AND IS PROPRIETARY TO MILLIKEN.

PrintWorks™ enables complex pattern effects and color combinations, not possible with any other carpet manufacturing technology. Innovative and fascinating designs are produced as pattern and color converges with different carpet constructions.

FREE FLOWING PATTERNS

COMPLEX AND STRIKING EFFECTS

VAST AND EVOLVING COLOR PALETTE

QUICK LEAD-TIME AND PRODUCT LONGEVITY

Foliage in Local Climate, monolithic installation

### Solution Dyed Nylon

USING A RANGE OF SOLUTION DYED NYLON (SDN) YARNS AND COMBINING THEM WITH OUR STATE OF THE ART TUFTING TECHNOLOGY, WE ARE ABLE TO CREATE A PORTFOLIO OF DESIGNS THAT COMPLEMENTS OUR PRINTWORKS® COLLECTIONS AND OFFER OUR CLIENTS A FULL PORTFOLIO OF AESTHETIC, CONSTRUCTION AND BUDGET POSSIBILITIES.

OUR SDN TUFTING TECHNOLOGY ENABLES THE CREATION OF:

ORIGINAL & BEAUTIFUL COLLECTIONS

INNOVATIVE YARN COLLECTIONS

VERSATILE COORDINATES

SUSTAINABLE SOLUTIONS

BUDGET ALTERNATIVES

Underground (Left) and EC1 (Right) in Empire, monolithic installation

## ● A Full Range of Floor Covering Solutions

### Luxury Vinyl Tile

MILLIKEN FLOOR COVERING OFFERS PRODUCTS AND EXPERTISE IN ALL AREAS OF YOUR COMMERCIAL SPACES, INCLUDING HIGH-PERFORMANCE ENTRYWAY SYSTEMS, MODULAR CARPET, LUXURY VINYL. SIMPLIFY YOUR FLOORING PROJECTS BY WORKING WITH A TRUSTED PARTNER THAT LETS YOU FOCUS ON ENJOYING THE PROCESS OF CREATING A GREAT SPACE.

## ● The WELL Building Standard

The new WELL Standard moves the emphasis away from physical structures and directs it towards the people inside. After all we spend approximately 90% of our time indoors.

One of the primary drivers of this approach is the opportunity to directly impact the well-being and productivity of a building's occupants. While operational savings, such as reduced energy and water bills are substantial achievements, few investments generate greater returns than those designed to boost employee productivity.

## Milliken Has Deep Values in Health & Wellness

### PRODUCT SAFETY

- + Declare Red List Free 3<sup>rd</sup> Party Verified
- + Our secondary backing is 100% polyolefin based
- + WellBAC™ products ensures the lowest VOC emissions

### MOISTURE MANAGEMENT

- + Active moisture wicking technology
- + Minimizes damp conditions preventing mold and mildew buildup

### COMFORT

- + Reduce muscle fatigue from prolonged standing
- + Absorb more noise, making for a much quieter environment

### SUSTAINABILITY

- + 100% recyclable
- + Recycling manufacturing waste into engineered plastic parts
- + Felt layer uses recycled plastic bottles

### PERFORMANCE

- + 3<sup>rd</sup> party testing certified, meeting the highest demand for commercial tile
- + A comprehensive lifetime warranty covers 12 key performance attributes

### INSTALLATION

- + Enhanced dimensional stability and flatness
- + Non-reactive to floor adhesive residue
- + Leaves no residue on the floor when replacing old carpet
- + Easy to handle and cut
- + Non-slip backing

## About Works with WELL™

We are proud to have been granted The Works with WELL™ licence across an extensive selection of our global product portfolio, demonstrating how Milliken floor covering products align with specific strategies in the WELL Standard.

The Works with WELL trademark licensing program recognises products and solutions that contribute to achieving specific features in the WELL Standard. Product's that have earned the Works with WELL mark have been validated through one or more review cycles to give specifiers the maximum confidence in their material selections, whether working on a WELL certified project or simply wanting to ensure they are adopting best practices for healthy, sustainable, people-first spaces for their clients.

### Milliken Floorcovering Works with WELL™

With over 800 product options listed, Milliken's modular flooring works to support the following WELL Building Standard concepts:

## ● Well-Being and Acoustics

Unwanted noise in the workplace is a significant contributor to stress, fatigue, illness and absenteeism. Sound is one of the 10 Concepts in WELL Building Standard (WELL v2.). Milliken recognizes that the floor surface can have a critical impact on the acoustics of a busy workspace and we offer a range of valuable floor covering solutions and strategies for addressing the issue of sound, as it relates to the floor. The right floor covering choice, for the appropriate area, can create a workspace where sound levels are more comfortable, boost concentration, memory and focus and increase morale and productivity.

### 1. SOUND ABSORPTION

The sound absorption provided by Milliken carpet, with its WellBAC™ cushion backing and high-performance fiber, reduces noise reverberation time and therefore reduces echo. This in turn improves speech quality, allowing for better communication in collaborative environments.

### 2. SOUND GENERATION

This refers to a material's potential for generating noise. Foot traffic across a floor is a noise-generating process. Polished concrete or wood floors will generate more noise than floors covered by carpeted surfaces and floors carpeted with Milliken WellBAC™ cushion back carpet will generate 24% less noise than those carpeted with hardback carpet. It is important to note that among office surfaces, the floor is by far the largest producer of impact sound, from football in busy walkways, to furniture movement and even dropped objects.

MILLIKEN WELLBAC™ CUSHION  
BACKING ABSORBS UP TO

**60%**

more noise than hardback

MILLIKEN WELLBAC™ CUSHION  
BACKING PROVIDES

**24%**

less noise generation  
than hardback carpet

### 3. SOUND TRANSMISSION

This refers to the transmission of noise between spaces through a wall or floor. Reducing sound transmission between space will allow for calmer environments and improved concentration. Milliken WellBAC™ cushion back carpet can play a vital role in absorbing noise and reducing sound transmission between areas.

**90%**

less noise generation  
than a hard surface

## ● Well-Being and Underfoot Comfort

Milliken WellBAC™ Comfort Cushion backing has a huge impact on comfort and fatigue.

In retail and hospitality environments where comfort is a vital part of the overall customer experience, Milliken cushion backing helps create a more relaxing and luxurious environment where guests will feel more at home and want to linger longer.

### HERE'S HOW IT WORKS

The open cell cushioning used in Milliken's cushion backing features the same type of technology found in high-performance athletic shoes. With greater underfoot support, Milliken WellBAC™ Comfort cushion backing significantly reduces leg muscle fatigue.

### SIT-STAND DESKS

A cushion-backed carpet tile can improve the comfort and well-being of standing workers, encouraging them to stand longer and move around more. This improves heart rate and helps burn calories. Leg muscle fatigue is reduced by as much as 24%, and heel impact loads by up to 30%. This translates into fewer aches and pains and real benefits for those employees that either have to, or choose to, stand for large portions of their working day.

MILLIKEN WELLBAC™ CUSHION BACKING  
reduced leg muscle fatigue by up to

24%

Breeze in Oasis(50x50cm), monolithic installation  
Ripple in Oasis (25x100cm), ashlar installation

## ● Well-Being and Indoor Air Quality

It has been suggested that better Indoor Air Quality can increase productivity by up to 11%. AIR is a key concept in the WELL Building Standard and aims to ensure high levels of indoor air quality throughout a building's lifetime through diverse strategies that include source elimination or reduction, active and passive building design and operation strategies and human behavior interventions.

### CUSHION BACKING AND MOISTURE MITIGATION

#### Moisture Mitigation

The ability of a floor covering to deal with moisture is a key contributor to a building's indoor air quality. This is particularly important if there is a concrete slab or sub floor moisture. Where a concrete slab is present, it is important to consider whether the floor covering can withstand high vapor emissions, allowing moisture to escape and helping to prevent mould formation.

#### Air Quality Certification

Milliken's open cell cushion backing is permeable, meaning that water vapor molecules can pass through Milliken cushion back carpet and evaporate away. This eliminates the need to carry out extensive moisture mitigation before installation and there's no risk of expensive moisture problems either.

All Milliken cushion backed modular carpet achieves Green Label Plus certification from the Carpet and Rug Institute. This certification enables Milliken carpet to achieve LEED IAQ standards. This distinction is awarded only to products emitting very low levels of VOCs.

### TRACTIONBACK®

This proprietary adhesive-free installation system allows Milliken modular carpet to be installed without adhesives. The off-gassing and VOCs associated with traditional adhesives is therefore eliminated and IAQ enhanced.

### PROTECTIVE FLOORING

To ensure the best quality of Indoor Air, it is essential to minimize the introduction of pollutants at a building's entrance. An appropriate entryway system is key to keeping dirt, debris, moisture and harmful contaminants from even entering a building. Milliken offers protective flooring solutions, manufactured with 100% recycled Econyl® fiber that coordinate with Milliken carpet collections. Milliken protective flooring can improve a building's Indoor Air Quality as well as adding to its green credentials by protecting the carpet and so extending its life.

## ● Well-Being and Aesthetics

As well as the functional aspects of design, the aesthetics of a space have a profound effect on mental health and general well-being. The MIND concept within the WELL Building Standard recognizes this and promotes mental health through policy, program and design strategies that seek to address the diverse factors that influence cognitive and emotional well-being. The selection of materials, including floorcoverings, can contribute to this section of the standard.

### BIOPHILIC DESIGN — BRINGING THE OUTSIDE IN

Biophilic design can help improve the overall mood and ambiance of a workplace. Milliken's wide-ranging portfolio features a number of collections made with proprietary PrintWorks® digital dye injection technology that is uniquely capable of creating free-flowing patterns with the smooth transitions seen in nature. PrintWorks® can produce carpets with thousands of shades of color, mimicking the way colors in nature blend seamlessly. Colors and textures of the outside environment can be imaginatively embraced and brought inside to lift workplace spirits.

BedRock and WaterFall in Moss Lake, ashlar and herringbone installation

### FLOORING DESIGN FOR ZONING AND WAYFINDING

From a more functional perspective, flooring can help contribute to a building's accessibility and flexibility by helping occupants to navigate the space. Floor layout can help with wayfinding and identify different floors and define work and relaxation zones within a building.

Explorer, Relief, Navigator and Regions in Border and custom, monolithic installation

Center Accent, East and Center Neutral in Mid Gray With Rose, monolithic installation

### CREATING A SENSE OF PLACE

The final concept in the WELL Building Standard is COMMUNITY which aims to support access to essential healthcare, workplace health promotion and accommodations for new parents as well as establishing an inclusive, integrated community through social equity, civic engagement and accessible design. Communities are characterized by groups of people with diverse characteristics who are linked by social ties, share common perspectives and engage in joint action and experiences in shared settings or locations.

At Milliken, we believe that a healthy enterprise and healthy Earth are vitally linked. We care about and respect, our customers and the world we share.

## ● Sustainability Program

PRESERVING NATURE'S FOOTPRINT WHILE CONTINUALLY REDUCING OURS.

As a company, we have set a high bar for ourselves by publishing a set of measurable goals for 2025. These include Planet Goals to shrink our footprint. Product Goals to promote circular economies and People Goals to care for our employee and communities.

Reduce indexed greenhouse gas emissions, water usage, and solid waste by **25%**

**ZERO**  
waste to landfill

Increase renewable energy use **10X**

**ZERO**  
environmental violations

### PLANET

Reducing our goal footprint to increase our global impact

**2025  
GOALS**

### PRODUCT

Creating circular economies depends on internal assessments and industry-wide collaborations

Analyze new products launched using Life Cycle Analysis principles

Convene scientists and thought leaders to advance the goal of solving the plastics end-of-life challenge

### PEOPLE

Developing cutting-edge innovations begins with cared-for communities

An inclusive employee community

**ZERO**  
lost time safety incidents

**ZERO**  
data privacy breaches

**100,000**  
volunteer hours in our local communities

## • Transparency and Certifications

THE GOAL OF OUR SUSTAINABILITY EFFORTS IS TO 'DO GOOD,' AND 'DOING GOOD' STARTS WITH COMMUNICATING IN AN HONEST, CREDIBLE AND TRANSPARENT MANNER.

Milliken works with key industry groups and certification organizations to ensure full disclosure and complete transparency around our products and their components. Key third party certifications include:

DECLARE®

CRI GREEN LABEL PLUS

CRADLE-TO-CRADLE

THE SINGAPORE GREEN  
BUILDING COUNCIL  
(SGBC)

EPD UL CERTIFIED

HEALTH PRODUCT  
DECLARATION

SINGAPORE GREEN

RESET® STANDARD

## ● M/PACT™

CLIMATE CHANGE IS ONE OF THE GREATEST THREATS FACING HUMANITY, AND WE ARE ALL RESPONSIBLE.

That's why Milliken Floor Covering launched the M/PACT™ carbon offset program. Today, our carpet and LVT are carbon offset everywhere in the world. M/PACT carbon offset products offset the raw materials and manufacturing carbon footprint\* by using 3rd party Verified Carbon Standard Credits that support renewable energy and carbon reduction technologies to help fight climate change. When you choose M/PACT products, you can be sure your choice is carbon offset.

### INVESTMENT

Today we invest through renewable energy credits, verified carbon offsets, and are beginning to invest in Milliken owned renewable energy projects. Over the past 2 years, a focus on sourcing of materials close to manufacture reduces transport of materials in our Asia business. This combined with a reduction in energy for carpet backing has reduced the carbon footprint of cushion products by 30%\*.

### DEMATERIALIZATION

We continue to focus on increasing recycled materials in our products to support the advancement of a circular economy - one that uses less new raw materials and creates less waste. Milliken non-PVC WellBAC® function backing is 100% recyclable WellBAC® Comfort uses 78% recycled foam for cushion backing, resulting in 14-22% less new raw material used in WellBAC® Comfort carpet tiles.

### WELLNESS

Climate change directly impacts human health and wellness. As a founding member of the Well Living Lab and a Well Portfolio Member, we aspire to design products that enhance well-being and quality of life of indoor spaces.

### MATERIALS

We believe material health is essential to enable circularity. The use of materials that don't contain harmful chemicals is a critical pathway to end of life product recycling. Our carpet, resilient flooring, and entrywaytile are recyclable.

### MANUFACTURING

We leverage our global manufacturing and local supply chains to minimize carbon emissions. With investments in higher efficiency equipment, we increased the efficiency of our carpet tile backing process in Asia, reducing electricity needs by 31%.

### WE WILL CONTINUE TO DO MORE TO LOWER OUR CARBON FOOTPRINT.

The M/PACT™ program is long-term, because the fight to stop climate change will be a long one. As a global manufacturing company, we set 2025 goals that align with the United Nations Sustainable Development Goals. We push ourselves to meet our targets on Planet, Product, and People, including a 25% reduction in indexed greenhouse emissions by 2025. These 2025 goals are a benchmark for us to achieve more, faster. We encourage you to specify our carbon neutral products for all of your projects to ensure the climate change journey continues.

## M/PACT™

CARBON OFFSET PROGRAM

\* As calculated through a ISO14025/ISO14040 compliant LCA's and published in 3rd party verified EPDs.

## ● N/XT LIFE™

THE LIFESPAN OF CARPET IS LONG, SO IT'S IMPORTANT TO MAKE IT COUNT - FOR ALL PEOPLE AND THE PLANET.

Material waste is a universal issue, overcrowding landfills and filling up solid waste streams. In response, we developed the N/XT Life Program, where longevity, transparency and circularity are the keys to its success. Through reducing materials used, reusing and recycling, we are taking actionable steps to advance the circular economy and mitigate climate change. By employing a multitude of earth-conscious methods and practices, we are committed to offsetting our carbon footprint until we can fully eliminate it.

### REDUCE

#### VALUE ENGINEERED CONSTRUCTIONS

We've mastered the art of outputting less materials while maintaining uncompromised quality and performance. Our Building Blocks C., Cornerstone, Nature Supply and Retrofit these collections utilize less material and incorporates more aesthetics and design appeal.

#### LESS VIRGIN MATERIAL, AND MORE RECYCLED CONTENT.

On a global scale, we have developed polyurethane backed cushion carpet tiles with recycled polyurethane constructions. We utilize locally recycled polyurethane sourced from polyurethane manufacturers that are customers of Milliken Chemical, leveraging our larger company for circularity. To further support our goal of making a positive environmental impact, we also use 100% recycled yarn into our products.

### REUSE

#### HEALTHY MATERIALS WITH 3RD PARTY VERIFICATIONS

Superior products begin with healthy materials. We ensure that all of the materials we use for our modular carpets and disassembly adhesives are free of unnecessary plastic and certified Red List Free, building a foundation for circular products and transparent material health. By incorporating recycled content, we are able to produce durable, long-lasting products.

#### LOCAL REUSE SOLUTIONS THROUGH LOCAL PARTNERS

Milliken works with our local partners to give new life to used carpet. They warehouse, resell and donate collected carpet tile to commercial spaces and charity organizations.

### RECYCLE

#### OUR CARPET IS 100% RECYCLABLE

Our cushioned carpet backing is made from recycled polyurethane (PU), sourced from local PU manufacturers. This localized process lowers our carbon footprint, fuels our local supply chains of recycled content and reinforces commitment to material health. At the end of the carpet tile's life, the backing can be taken off and re-processed into new carpet tile, maximizing its potential.

#### LOCAL RECYCLING PARTNERS

We have developed robust local recycling solutions through strategic partnerships to effectively recycle our carpet tiles. Our established network of suppliers is equipped to collect used carpet tiles and seamlessly integrate them into existing recycling streams, resulting in an 100% diversion rate. These collected carpet tiles are transformed into fiber plastic panel products, which find purpose in outdoor flooring and fencing projects.

# AIR BORN

Inspired by boundless freedom and lightness of the sky.

Breath of fresh air, discover the endless possibilities found in the ever - changing atmosphere.

## AIR BORN / Drift

**Construction**  
Tufted, Textured Loop

**Tile Size**  
25 cm x 100 cm

**Face Fiber**  
100% Milliken Certified Nylon

**Dye Method**  
Solution Dyed

**Standard Backing**  
PVC-Free WellBAC™ Function  
Available With Tractionback®

**Nominal Total Thickness**  
5.5 mm ±10%

**Texture Appearance Retention**  
Rating (TARR)  
Heavy

**Recommended Installation**  
Method(s)  
Planks

(left) Drift in Flora, Bayou, Aero and Hazel, (middle) Drift in Ash, (right) Drift in Hazel, ashlar installation

DFT6-209 ASH    DFT13-6 STONE    DFT120-218 HAVEN    DFT79-174 JET    DFT251-217 SAND    DFT206-217 HAZEL    DFT128-209 FLORA    DFT157-209 AERO    DFT125-209 BAYOU

AIR BORN / Aeromotion

Construction  
Tufted, Textured Loop

Tile Size  
25 cm x 100 cm

Face Fiber  
100% Milliken Certified Nylon

Dye Method  
Solution Dyed

Standard Backing  
PVC-Free WellBAC™ Function  
Available With Tractionback®

Nominal Total Thickness

## BRUSHED BY TRADITION

A fusion of artistic tradition and the timeless allure of the East.

Each carpet tile is a canvas, harnessing the intricate grace of calligraphy brush motifs, evoking the essence of rich cultural heritage, seamlessly weaving together the threads of history and modern product design.

Unveil a new world underfoot, where every step is a brushstroke, and every tile, a work of art.

## CITY PROPER 2.0

Pavement markings, worn asphalt, and heavily traveled concrete create direction for us in our daily existence. But what happens below the streets shapes our perspective on elements that create life in the city. It's the intertwining cables, paths, tunnels, and layers of municipal structure that reveal how a city breathes and evolves.

City Proper 2.0 challenges us to examine beyond the expected surface, to consider multiple levels of construction and texture, light and shadow.

EC1 in Empire, monolithic installation

**COASTLINE**

Where the land meets the sea to offer a natural boundary and beautiful breathing space. An area of rugged resilience and uncompromising beauty. Remote depths of maritime colour and rich, rippling textures appear as the rugged shoreline meets the splendour of the coastal cliffs and a new journey begins.

## COASTLINE / Landscape - Cool

## COASTLINE / Landscape - Warm

## COMFORTABLE CONCRETE

Rough, urban and raw. Refined and lovingly polished.

Unexpectedly plush, warm and ornate.

Combining with other materials to enter our lives in new and surprising ways.

## COMFORTABLE CONCRETE / Laid Bare

**Construction**  
Tufted, Textured Loop

**Tile Size**  
50 cm x 50 cm  
50 cm x 100 cm

Urban Poetry in Powder Rose, monolithic installation

## COMMON THREAD 2.0

There is a beauty to nature that seems both purposeful and accidental. It's this mix of randomness and order that creates patterning nobody could replicate. Take the skin of a tree, for instance. A tree ages, sheds, and renews its layers, and in doing so reveals different levels and scales of bark patterning.

Point 3 and Point 5 in Alerce and Alerce with Electric, Formwork 2.0 in Electric, monolithic installation

COMMON THREAD 2.0 / Point 3

Construction  
Tufted, Textured Loop

Tile Size  
50 cm x 50 cm

## DESIGN DESTINATIONS

Design Destinations collection takes you on a ride through eight themes that explore the distinct ambiance of individual colors.

Here we witness how the fusion of shades can make it feel like we're stepping into another time and place; a whole new surge of emotions derived within the four corners of a room, creating moments that last.

Feeling passionate, zen, motivated, or nostalgic? What is your color destination? Let's dive in.

## DISSIDENT & FRINGE 2.0

Conventional ideology may identify those who challenge the status quo as a non-conformist; creators of dissidence and living on the fringe. Embodying a sense of irreverence pushes boundaries and allows us to explore how beauty can be created from that which seems uncommon and outside our boundaries, yet intriguing in a way that captivates our imagination.

Dissident and Fringe 2.0 explore layers of texture created from color and construction offering a balance of organic and architectural pattern options for the floor. With a shared color palette influenced by materials such as stone and concrete, these two designs evolve the aesthetic for textural modular carpet.

## DISSIDENT & FRINGE 2.0 / Dissident

**Construction**  
Tufted, Textured Loop

**Tile Size**  
50 cm x 50 cm

**Face Fiber**  
100% Milliken Certified Nylon

**Dye Method**

## DIVIDED GLASS

In physics, refraction is the redirection of a wave as it passes from one medium to another. As light passes through air and into another clear material (such as glass), it changes speed, and light is both reflected and refracted by the glass.

The Divided Glass Collection depicts this refraction of light, coinciding with the shadows casted through architectural glass divisions. The luminescence passing through differing textured glass surfaces results in an emblem of amorphous hues with soft transitions.

## FORMWORK 2.0

The simplicity of form truly defines function. Refind to the elemental, the structure is both clever and quiet. The mood adapts and configures to those who occupy it becoming a place of making and doing or just one of reflection and peace. Offering understated simplicity and texture in a sophisticated palette, Formwork 2.0 provides a practical and timeless coordinate to a wide selection of Milliken collections globally. The functional modular tile provides a full range of solutions. It can be used as a modern, full-field solid, define circulation or act as a transition between patterns.

## GENTLE GROUND

Gentle Ground is a collection that blurs the boundary between what is felt and what is seen — where hard surfaces carry the visual and emotional warmth of textile and nature. This collection was designed to soften interior spaces through subtle tactility and refined surface movement.

Each pattern explores the concept of comfort underfoot, not through plushness, but through nuanced visual texture and natural calm. Whether it's the pebble-like softness of Grounded Suede or the sweeping, architectural rhythm of Grounded Contours, the collection transforms LVT into a canvas of gentle expression.

**FLEXFORM™**  
LUXURY VINYL TILE

Grounded Suede in Tender Root, Grounded Contours in Tender Root, ashlar installation

GENTLE GROUND / Grounded Suede

Construction  
High Performance Flexform™ LVT

Finish

GENTLE TOUCH

Inspired by the delicate interaction between texture and light, this collection creates an atmosphere of warmth, softness, and refined depth. Every surface is crafted to be inviting and tactile, evoking the soothing sensation of woven fabrics, brushed suede, and flowing contours. Designed for spaces that seek warmth, calm, and effortless elegance, Gentle Touch offers a harmonious balance between subtle texture and timeless sophistication.

GENTLE TOUCH / Brushed Suede

# HEAVY META

Metal is a crucial material that shapes our experience in the modern world.

But what happens when this heavilyrelied upon material is pushed to its limit? Introducing Heavy Meta, a new carpet collection that examines the perplexing conversion of this common material into a new and unexpected manifestation. With the activation of a catalyst, can metal thrive?

## LAYLINES

Lively and vibrant movement across the canvas reveals passion and intensity, with each color combination invoking a new interaction of pattern and form.

Flurries of lines offer interest and fluidity, whilst a vast array of contrasting and complementary hues provide a plethora of options. Breath-taking and high energy brights are counter balanced by beautifully blended and rich neutrals.

## LIVE STREAM

The Live Stream collection illustrates the beauty of water as it journeys on: First as GroundWater - a neutral palette that blends in effortlessly - gently sipping its way into the FlowRiver where its exquisite patterns materialize. At the BedRock is where its color contrasts flow and jive into one, awaiting the great WaterFall to fully unleash a harmony of accents.

## LIVE STREAM / GroundWater / FlowRiver / BedRock / WaterFall

**Construction**  
Tufted, Textured Loop

**Tile Size**  
25 cm x 100 cm  
100 cm x 100 cm

**Face Fiber**  
100% Milliken Certified Nylon

## LIVING FACADES

Inspired by this green facade concept, we decided to create a similar effect on the floor. We took the layered and arranged system of different plants as the basis for designing a repeating pattern in modular carpet tile. By arranging these tiles in a modular system, one can create a pattern that mimics the layered and overlapping growth of a vertical garden.

This approach allows for a unique and visually stunning design while promoting sustainability in the built environment.

## LUMENOLOGY

We believe spaces can be bright, welcoming environments with the simple introduction of color, texture and pattern to the flooring design.

The Lumenology collection brings light and energy into all spaces with its playful patterns and diverse color palette.

## LUMENOLOGY /FLEXFORM™ LVT

**Warranty**  
22 Year Limited Commercial Wear  
Warranty

Light Stitch in Translucent LLS257, Reveal LLS144 and Dim LLS13, Reflective in Umbra LRF6-154, herringbone installation.

## MAJOR FREQUENCY: ONE

Sound can beckon to the core of our emotions. What begins as a singular wave can multiply and curiously sync together, eventually inciting a poignant experience within each of us.

Introducing Major Frequency: One, the first wave in a series of inspiration rooted in the realization of sound's power. Through two organic patterns expressed in 13 unhindered color options, this collection explores the possibilities that exist within raw and unencumbered cymatics.

## MAJOR FREQUENCY: ONE / Vibration / Distortion

**Construction**  
Tufted, Textured Loop

**Tile Size**

## MIXED FORMATIONS

A peaceful land between home and office.

The Mixed Formations Collection is a combination of natural surfaces from the outside environment. There are 4 wood patterns and 5 stone textures, in a variety of dimensional tones. We invite you to discover our approach to creating a healing environment through natural textures.

## MOMENTUM 2.0

*"Nothing happens until something moves"* Albert Einstein.

Ideas, preparation, knowledge, and wisdom are all but useless without action, because action is the starting point of all progress. Moving and action builds the fundamental laws of change. The Momentum 2.0 collection explores this beauty of movement. 3 different scaled patterns transitioning from Invisible Field, Quantum to Dimensions...

Create your movement on the floor with the Momentum Collection.

## NATURALLY DRAWN

"Art takes nature as its model."  
Aristotle nature's calendar artist's studio, from the outside to the to create three designs drawn from nature and reinterpreted through artistic expression. Watercolor Lesson, Drawing In Ink, Hand Sketched and Hand Sketched Transition, each one lovingly crafted through its artist's medium: watercolor, ink and pencil sketch. Four designs, each with a story to tell.

NATURALLY DRAWN / Drawing In Ink

Construction  
Tufted, Textured Loop

Tile Size  
50 cm x 50 cm

Face Fiber  
100% Milliken Certified Nylon

Dye Method  
PrintWorks™

Standard Backing  
PVCFree WellBAC™ Comfort  
Available With Tractionback®

Nominal Total Thickness  
8.8 mm ±10%

Texture Appearance Retention  
Rating (TARR)  
Severe

Recommended Installation  
Method(s)  
Ashlar

Drawing In Ink in Meadow/Olive, ashlar installation

## NATURE SUPPLY

The babbling brook in the morning, the dense jungle at noon, the scattered rain in the evening...Nature has supplied us all the beauty and enjoyment. What is the feeling to explore the forest? Can we relax by experiencing peace in nature?

Let's get away from the tension in the office, give ourselves a chance to get close to nature and feel the gift of nature right here in the office.

## NORDIC STORIES

Our travels have taken us to extreme environments: the surreal contrasts of Iceland, a country powered by nature and made up of sulphurous plains, salt terraces and geothermal pools. This is geological drama at its best, a place where isolation and dark winters create the backdrop to a unique breed of creativity. In contrast the gentle landscape of Denmark. A country peppered with archipelagos and lush forests and home of 21st Century design, where form and function meet utopian ideology.

Nordic Stories is inspired by the textural landscape, geological extremes, folklore and modern culture of the Northern Hemisphere. Muted natural tones, black volcanic rock, deep blue lakes, rich golden moss, graphic landforms and bold architecture. This Collection represents the sensory experience that is the Nordics, a series of diverse countries with distinct identities that have collectively helped to define contemporary design culture.

## PASSAGE

The Milliken Passage collection echoes with light, through its direction, intensity, color and contrast; maximizing the environment's function and purpose. From speckles of dusts to fluid directional movements, the patterns flawlessly create a visual passage, radiating a glow that, not only enlivens, but also create an aesthetic journey. An experience to be created through layered illumination of patterns and objects.

PASSAGE / Absolute Color

COLORLINE

## PATINA

Patina illustrates the acquired change of natural surfaces through age and exposure. The multitudes of contrasting textures and divergent surfaces creates a non plus ultra in any given space.

Stone, Copper, Bronze, Wood.  
Coordinate your space through the rediscovery of Patina.

PATINA

Construction  
Tufted, Textured Loop

Tile Size  
25 cm x 100 cm

Face Fiber  
100% Milliken Certified Nylon

Dye Method  
PrintWorks™

Standard Backing  
PVC-Free Wellback™ Comfort  
Available With Tractionback®

Nominal Total Thickness  
8.4 mm ±10%  
(For Trimline Product)

Texture Appearance Retention  
Rating (TARR)  
Severe

Recommended Installation  
Method(s)  
Monolithic  
Planks

Patina in Powder Steel & Blue Steel, 25cm X 100 cm, ashlar installation

## PATINA COMPOSITIONS

Patina is the acquired change of natural surfaces through age and exposure.

Patina Compositions enhances this culmination of change through the addition of color across each color story.

This progression of color through the 4 modules enables you to undulate multiple facets of shades where endless configurations can be discovered.

Coordinate your space through the rediscovery of Patina.

# PENTOMINO 2.0

Squares shift to connect, link, and form new shapes. Rotating in a direction based on an axis, the symmetry subset is derived.

Clues hidden behind the seemingly complex information are revealed.

Discover the fun of creation and balance with Pentomino.

## PLAYANGLE

The PlayAngle collection consists of 5 different patterns, enabling customizable gradation lengths for any given space.

Each pattern has a three level gradation A-B-C resembling:

Dark-Medium-Light values within each pattern set.

All 4 patterns can be connected to create a larger gradation, or numerous other layout configurations.

A close-up photograph of sand ripples, showing a series of parallel ridges and troughs. The lighting creates a strong sense of depth and texture, with the ridges appearing slightly elevated and the troughs receding into the background. The overall tone is warm and earthy, with shades of tan and brown.

## RIPPLE EFFECT

The Ripple Effect Collection draws inspiration from the brackish estuary where fluvial freshwater and ocean tidal forces meet. This percussion of tidal crescendos - saltwater intrusion merging with freshwater aquifers and surface ripples - creates a sophisticated natural milieu design, when viewed from an aerial perspective.

Layered textural elements are created through natural light reflecting off the water's surface, enhancing the feature by the reflective essence of the design. While the underwater motion of the swirl stimulates the soft movement of the ocean bed, formulating increments and the "Ripple" effect.

## REVELATION

Discover time-worn luxury that engages the senses. This is the Revelation collection, textured carpet in three patterns with 12 colors and a mix of yarns and lusters. A look inspired by antiquity with rich textures, patinas and layered colors that reveal vibrant jewel tones. Occasional hints of a master weaver's artistry.

With this collection, you can elevate the style of any space while filling it with comfort.

## SCREENPLAY

The Screenplay collection draws inspiration from the structured elegance of architectural screens, blending geometric precision with layered depth. Designed to define space with rhythm and movement, this collection plays with light, shadow, and transparency—much like the interplay of frames in a film.

## TERRA

The Terra Collection explores the diverse applications of stone, presenting a range from flat, tonal surfaces to designs that accentuate the intricate grains and textures of natural materials.

Whether you desire the understated elegance of softer textures or the richly textured colored stones, Terra provides an array of options to elevate and personalize any space.

## TOPOGRAPHY 2.0

Topography is the study of the shape of the Earth, depicted in a map form. This has been a source of inspiration for many different mediums in art and design.

At Milliken, we took this inspiration to explore the graphical representation but also the functional usage of a map.

100▲

# WARP & WEFT

Celebrates the timeless artistry of textiles, weaving together tradition and modernity in a series of sophisticated patterns.

Drawing inspiration from the intricate interplay of threads, this collection brings depth, texture, and movement to interior spaces.

## WICKER CONTRACT 2.0

Basketry is a traditional form of weaving using natural plant materials. 3 dimensional forms can be created through the tightly interlaced fibers.

The Wicker Contract collection explores this texture of basket weave structures. Geometric yet Organic. The 2 patterns act as coordinates, field: Groundwork and pattern: Draftwork.
