

Product Stewardship

Over a Century of Environmental Stewardship

Continuing Milliken’s heritage of over a century of environmental stewardship, and our “No Carpet to Landfill Pledge”, Milliken carpet takeback program provides three non-landfill solutions to ensure that used carpet is recovered and managed in an environmentally, socially, and financially responsible way.

Reuse

To ensure that the product gets maximum useful life, Milliken Australia has arrangements with charities and second-hand dealers to repurpose used carpet tiles into the second-hand market.

EarthPlus

EarthPlus is a unique renewal process for carpet tiles. A program that uses the Millitron digital dye injection (PrintWorks™) process to give a second and possibly third life to Milliken carpet tiles.

The carpet goes through a three-stage process where it is super cleaned, retextured, and re-patterned with a new design and a new warranty.

LVT Product Stewardship Program

Milliken Australia is a Signatory to the Viny Council of Australia PVC Stewardship Program, a voluntary undertaking by the Australian PVC industry to address all relevant environmental, health and safety issues along the PVC product lifecycle including end-of-life options in Australia. All our LVT products are manufactured in facilities that are ISO 9001 and ISO 14001 compliant and are 100% ortho-phthalate free. Milliken (Australia) Pty Ltd and its manufacturing partners are committed to responsible life cycle management and the core principles of product stewardship and extended producer responsibility. As a supplier of LVT products, Milliken (Australia) Pty Ltd understands that corporate social and environmental responsibility goes beyond the point of sale and warranty periods. In conjunction with our manufacturing partners and suppliers, we will take back all LVT products and recycle them in the following ways.

1. Refurbishment of LVT products for possible reuse by existing customer or on selling/remarketing to new customers.
2. On selling or donation of LVT products in existing condition to other commercial businesses and organisations.
