

Milliken® Liquitint™ Winter

Advanced colorants for snow
& ice management

A unique technology developed by
Milliken Chemical for household
and industrial applications.

Liquid colorants provide brand identity and spray pattern indication without compromising the performance or safety of your salt formula. Loadings of around 0.005% to 0.5% of colorant to salt or brine solutions are common.

Liquitint Winter Colorants

- Stable and compatible with liquid and solid de-icing formulas.
- Recognized and used by DOT nationally.
- Homogeneous liquids that allow ease of handling and dispersment.
- Non-staining and non-ionic. Creates limited opportunity for skin exposure.
- Water soluble - decreasing the persistence of color in the environment.
- No negative environmental impact when used as directed.
- Does not contain and is not manufactured with heavy metals.
- Formulations containing Liquitint colorants have been approved by Safer Choice and other environmental agencies.
- Vivid colors available in any shade.

Please contact your Milliken representative for further product information including chemical registrations, food contact status, and other regulatory details.

PLEASE NOTE: As each customer's use of our product may be different, information we provide, including without limitation, recommendations, test results, samples, care/labeling/processing instructions or marketing advice, is provided in good faith but without warranty and without accepting any responsibility/liability. Each customer must test and be responsible for its own specific use, further processing, labeling, marketing, etc. All sales are exclusively subject to our standard terms of sale posted at www.milliken.com/terms (all additional/different terms are rejected) unless explicitly agreed otherwise in a signed writing.
