

Milliken®

Tire and Mechanical Rubber Goods

By combining expertise in textile surface chemistry and the physics of reinforcing dynamic elastomer systems, Milliken provides highly-engineered, ready-to-use reinforcements and processing aids to the rubber products industry. Our research and development has enabled us to create products that increase manufacturing efficiencies and deliver superior value and end-product performance.

Tire Components & Processing Aids

MilliCap™ HM

Treated, tackified, slit ready-to-use high modulus cap ply strips. Eliminates calendaring and slitting of cap ply in the tire plant.

MilliCap™ Aramid

Cost-effective Cap Ply Strip replacement for hybrid yarn systems. High modulus capability is tuned to deploy after tire turn-up.

Bead and Sidewall

Bead wrap, Chafer, Chipper, and Flipper fabrics, full width or slit and ready-to-use.

Process Liners

Cross-rigid or flexible, superior release, coated or uncoated, with strong, durable selvages.

Bladder Fabrics

Treated bi-elastic fabrics, in custom widths, for extending the service life of turn-up bladders for tire building machines.

Single End Tire Reinforcement

Treated single-end cord for cap ply applications and other single-end applications.

MRG Fabrics

Car Seat Reinforcement

Knitted PES fabric satisfying the stricter requirements from the automotive industry, available also with FR treatment matching ISO standards.

Hose Fabrics

Woven or knitted fabrics made in different materials, available in strips as well as in full width to protect or reinforce your hydraulic, industrial or automotive hoses.

Specialty Fabrics

Engineered fabric constructions and elastomer adhesion treatments for a variety of applications, including fuel cells, wing deicers, and molded rubber products.

Diaphragm Fabrics

PA and PES square woven fabrics with superior technical and processability performances; can be provided in ready to use version.
