

LET YOUR MOISTURE WORRIES EVAPORATE.

MOISTURE ISSUES IN SLABS CAN COST
UP TO 30% EXTRA.

Our carpet flooring can save you time and money, and here's why.

Our WellBAC® Comfort and Comfort Plus carpet comes with WellBAC® open-cell, cushion backing as standard.

It is designed to allow floors to breathe and moisture to evaporate.

Milliken™

With Milliken carpet, moisture vapour can travel freely through our open-cell cushion backing, venting naturally from the seams. Hardback carpet often traps moisture vapour, causing water condensation to form underneath the tiles.

See Installation Instructions and Product Warranty for more details.

Smarter products lead to better builds.

Avoid costly moisture mitigation and install floor covering sooner with Milliken.

Install Milliken carpet tile without costly moisture mitigation.

Install sooner after concrete pour.

No need to apply floor surface primer.

WellBAC® open-cell carpet backing allows floors to breathe and moisture to evaporate.

NEW CONSTRUCTION	CARPET
